INTRODUCTION

It is with great pleasure that I present my 1928 list of Dahlias; and I wish to thank my customers for their kind patronage and shall try my best to merit a continuance of this patronage by sending out only the best of stock.

Owing to the limited amount of floor space allotted me at the Boston Show, I was unable to compete with other growers for grand prizes, but, however, I was awarded two special ribbons for general display.

NEW INTRODUCTIONS FOR 1928

129 RALPH S. BAUER (H.C.) (Roach)

This is a very attractive dahlia and has made a big hit at the western trial gardens. Flowers grow very large and to quote Dr. Faulk, "An extra good all round dahlia, for Garden, Exhibition or Cut variety, best of habits, blooms early with tight centers up to frost; red hybrid cactus, tan reverse." This dahlia will be in great demand as soon as known and will be a prize winner, petals are very long and narrow, best of stems and well out of the foliage. Will be featured by Dr. Faulk, for season of 1928. Tubers, \$10.00. Plants \$5.00

551 JEAN M. MISSUD (H.C.) (Roach)

It gives me great pleasure to name this dahlia for one of our greatest musical conductors, known the world over, who is entering his fiftieth year as conductor of the Salem Cadet Band, which he has made famous. This dahlia will not grow as large as some varieties, but its beauty more than makes up for its size. It is a very robust growing plant and has stems that can be cut three feet long if wanted. The color is hard to describe as it has four colors. As the flower opens it shows a rich yellow with white tip, but as the flower matures it changes to yellow center shading to pink with white tip, reverse of petals shows streaks of salmon and white tip. Tubers, \$10.00. Plants 5.00

401 MRS. IDA L. DANFORTH (H.C.) (Roach)

Another very fine dahlia that will be sure to please. Plant has best of habits and grows very bushy and will produce large blooms if disbudded. Color is a beautiful shade of cerise, reverse of petals is silver. Blooms early and freely with good stems. Tubers, \$10.00. Plants 5.00

875 BECKETT'S ORIENTAL (Dec.) (Murphy)

A dahlia that has been very much admired by all that have seen it growing. As the flower opens it shows dark red with gold tips, when about half matured the color is about 50 x 50, yellow and red; when in full bloom, red predominates. Blooms grow very large on the best of stems. A very prolific bloomer. Tubers, \$15.00. Plants 7.50

930 ALL YELLOW (Dec.) (Murphy)

A new sensation that is a real yellow that will be sure to be at the head of the list in the yellow class. (All Yellow) is one of the best as it is a very profuse bloomer and flowers are unusually large naturally. Will grow 10 inch flowers and requires no feeding; has long wirey stems all above the foliage. Tubers, \$15.00. Plants 7.50

999 BABY PINK BEAUTY (Dec.) (Murphy)

Baby Pink Beauty is something new in the pink line and made a big hit at the Boston Show this season. They all wanted "999." A wonderful exhibition and cut flower variety, has great long wirey stems holding blooms high up above the foliage; very strong growing plant, with blooms from 6 to 8 inches in diameter and covered with blooms all season. Stock limited. Tubers, \$10.00. Plants 5.00

945 ROBIN RED BREAST (Dec.) (Murphy)

We have a lot of red and yellow dahlias, and yet in this combination we have a golden bronze, like the breast of a robin, hence the name. A very beautiful flower with golden orange and deep coin gold variations. One of the outstanding varieties: extra strong plants that grow great large flowers on good strong stems well above the foliage. I think this one of Mr. Murphy's best. Tubers, \$10.00. Plants 5.00

114 GOLDEN OCHRE (P.) (Roach)

This dahlia gets its name from its color, and one of the best is the peony class; also won the first prize at the Mitchell Nebraska Show this past season for the best and most perfect dahlia in the peony class. I know that this dahlia will grow 11 inches and over with very little care. Color is Golden Ochre, with salmon reverse. Tubers, \$7.50. Plants 3.50

103 SULPHUR QUEEN (D) (Roach)

One of the outstanding dahlias in my garden for the last two seasons. Blooms are large, and very full to center all season. Has fine long stiff stems well out of the foliage. A very profuse bloomer. Color is a beautiful shade of permanent or sulphur yellow. Tubers, \$7.50. Plants 3.50

307 SEA-SHELL (D.) (Roach)

In this dahlia we have a very beautiful flower with a very fine tight center all season; is an early and very profuse bloomer. Flowers will grow from eight to nine inches in diameter, has extra long stiff stems. Color is shell pink, shading to a white center, the outer petals being edged with light purple and covered with a golden sheen. Tubers, \$3.00. Plants 1.50
